Sub: Intimation under Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 - Grant of Patent

Respected Sir/Madam,

Pursuant to Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform that The Patent Office, Government of India, has granted Patent to the Company on February 13, 2025 for its invention entitled "**BENZALKONIUM CHLORIDE FREE OPHTHALMIC FORMULATION**" vide patent no. 560288, valid for a term of 20 years in accordance with the provisions of the Patents Act, 1970.

Akums Drugs and Pharmaceuticals Limited, one of India's leading Contract Development and Manufacturing Organizations (CDMO), has been awarded a patent for Benzalkonium Chloride-Free Brinzolamide Ophthalmic Formulation, designed for the reduction of elevated intraocular pressure (IOP) in patients with open-angle glaucoma or ocular hypertension. This milestone underscores Akums commitment to innovation in ophthalmic solutions, addressing the need for safer and more patient-friendly formulations.

Open-angle glaucoma and ocular hypertension are progressive eye conditions that can lead to irreversible vision loss if left untreated. Open-angle glaucoma, the most common form, develops gradually due to impaired drainage of aqueous humor, resulting in elevated intraocular pressure (IOP) that damages the optic nerve. Ocular hypertension, a condition where IOP is higher than normal but without visible optic nerve damage, significantly increases the risk of developing glaucoma over time.

In India, glaucoma affects approximately 11.9 million people, contributing to 12.8% of blindness cases. Among adults aged 40 years and above, the prevalence of glaucoma ranges from 2.7% to 4.3%. Addressing this critical ophthalmic challenge, Benzalkonium Chloride-Free Brinzolamide Ophthalmic Formulation offers a key advantage over traditional eye drops containing preservatives like benzalkonium chloride, which can cause ocular surface irritation, dryness, and discomfort with prolonged use. By eliminating Benzalkonium Chloride, this innovative formulation enhances patient comfort, making it particularly beneficial for individuals those requiring long-term glaucoma management.

This is for your kind information and record.

Thanking You

For **Akums Drugs and Pharmaceuticals Limited**
